## General Information

### Short summary

We are currently seeking a Software/AI Development Company to collaborate on a project for the Eurostar September 2024 Call. The project aims to develop an AI-powered Recruitment Platform. We are looking for a partner with expertise in Software and AI development to create this platform.

### Full description

We are a leading innovative HR and recruitment company based in Turkey. In addition to our recruitment services, we are actively engaged in research and development within our field. We are keen to participate in the Eurostar September 2024 call with the goal of developing intelligent AI-based software to enhance the hiring process and improve accuracy in matching candidates to jobs.

Currently, we are strongly interested in partnering with a Software Development Company that can assist us in developing this platform. Specifically, we require expertise in backend development, DevOps, and cloud service management solutions. Additionally, we are seeking AI specialists who possess expertise in NLP techniques and their applications.
