General Information

Short summary

A Slovak company, involved in professional audits and assessments of clean rooms (air quality and technical purity) has developed and protected with utility model a mobile disinfection unit. The company is looking for a manufacturer for investment and/or supplier agreement.

Full description

A Slovak company with a long-term experience in analyses of cleanliness of interiors and also in air quality and technical purity verifications has developed own solution of 3-in-1 disinfecting unit in order to contribute to growing need for hygienic security.

Apart from currently used products on the market, the unit is mobile and the technical solution eliminates limited disinfection effects of its competitors. Unit can be easily transformed to a site where needed.

The disinfection unit is designed to ensure primary hygienic security of people or things entering a building, it is 3-in-1 solution:

- It detects contaminated people or things (material, products, ...)
- It decontaminates
- It disinfects

The unit is equipped with sensors detecting throughput of people and things and with sensors detecting various

physical parameters in order to increase disinfection efficiency. Only UV-C type of radiation is used to prevent possible damage of materials/things.
The Slovak company is member of the international Air Quality Association and a partner of international and domestic institutions in the field of science, research and inspection in industry, healthcare, education and commercial spheres. The company is looking for a manufacturer that would be interested to license the product in order to manufacture it and market it. Also an investor is sought who would be interested to financially support establishment of a manufacturing facility.
The Slovak SME prefers the partners to cooperate via investment and/or supplier agreement.

Advantages and innovations

- 3-in1 disinfection unit
- Mobile solution, deployable where needed
- Sensors for detection of the throughput and physical parameters

Technical specification or expertise sought
