General Information

Short summary

A Belgian SME is looking for certified cleaning products used in aircraft engine overhaul and maintenance. The products must be officially approved by engine manufacturers such as Boeing, Rolls-Royce, ... The company is looking for a supplier or manufacturer of these certified cleaners and is interested in a commercial partnership for Benelux and Germany, Austria and Switzerland. Preferably under its own label, but sales under the partner's brand is also possible.

Full description

The Belgian company has strong expertise in flexographic printing and also has contacts with customers in the automotive and broader industrial sectors.

Due to increasing demand from customers involved in aviation maintenance and MRO (Maintenance, Repair, Overhaul), the company is looking to expand its product offering with cleaning agents that meet the strict certification standards required by major aircraft engine manufacturers such as Rolls-Royce, Boeing, GE Aerospace, and Pratt & Whitney.

These cleaning products are intended for use in:

- Overhaul and maintenance of jet engines and parts
- Cleaning of critical aircraft components
- Applications where official aerospace certification is mandatory

The company seeks to act as a distributor or commercial representative for these products in the Benelux and German-speaking regions (Germany, Austria, Switzerland). The preferred business model is distribution under its own brand (white-label), but representation under the manufacturer's name is also negotiable.

The company brings a solid industrial customer base, technical knowledge, and familiarity with certification requirements, making it a strong partner for companies seeking market expansion in this region.

Advantages and innovations

- Strong background in industrial markets, especially in automotive and manufacturing
- Existing network of customers with interest in aerospace-grade maintenance products
- Flexible partnership approach: white-label or manufacturer-branded solutions possible

Technical specification or expertise sought

Cleaning products approved for use in aerospace applications.

Stage of development
