General Information

Short summary

Family owned business from Latvia is looking for specific equipment (small production line) for the production of gluten-free vegan cookies. The small production line must allow for an automated process from the moment the dough is fed into the machine (manual work) to the moment the trays on which the cookies are placed are received and can be placed in the oven for baking.

Full description

The small production line must allow for an automated process from the moment the dough is fed into the machine (manual work) to the moment the trays on which the cookies are placed are received and can be placed in the oven for baking. On the small production line, it is necessary to perform the following sequential processes, which are performed automatically:

1. Roll out the dough (thickness from 20 - 40 mm, depending on the type of cookies)
2. Cut the dough 40x40 mm
3. Place the cut cookies on the trays.

Specific challenge to be solved: The dough is gluten-free vegan, which means it is not elastic. For some types of cookies, the dough consists of almonds and prunes, which are chopped beforehand, but in any case, the dough is heterogeneous and sticky.

Advantages and innovations

Technical specification or expertise sought

Technical Requirements:

1. The machine is designed for 220V
2. The machine is compact, because the width of the tray for the oven is 400 (width) x600 (length) mm
3. Production capacity 20-50 kg of cookies/per hour
