LEARNING ECOSYSTEM

# Compliance EUDR e filiere a “deforestazione zero”

## Quali criticità?

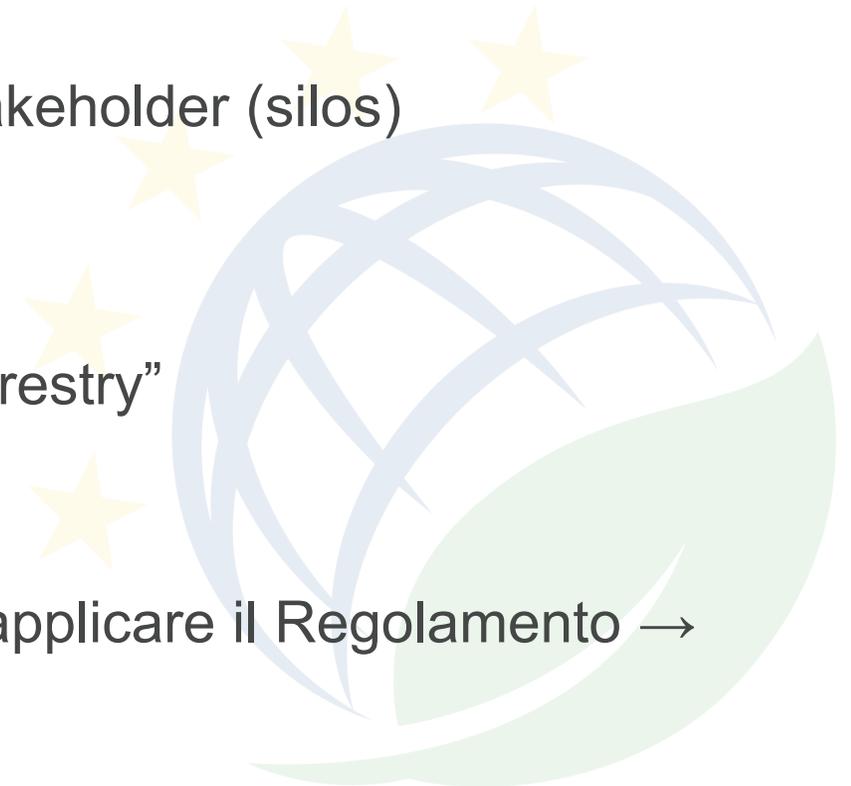

Scarsa condivisione conoscenze/connessione tra stakeholder (silos)

Lacune nella copertura formativa su DFSC/focus “Forestry”

Carenza competenze professionali per interpretare/applicare il Regolamento →  
Più interdisciplinarietà

## EMMA4EU

[www.emma4eu.eu](http://www.emma4eu.eu)

- Progetto co-finanziato dal Programma Erasmus+ per:
  - Rafforzare l'implementazione dell'EUDR
  - Contribuire a ridurre la deforestazione incorporata nelle filiere

**EMMA4EU Alliance** → Mette in rete Università, formazione professionale, imprese e ONG, creando opportunità di **sviluppo competenze e condivisione conoscenze.**

## Obiettivi

### Formare nuovi professionisti nella gestione di filiere «deforestation-free»

- Mettendo in connessione discipline e settori - **foreste, agricoltura, business e commercio** - e rispettivi attori chiave.

- Creando un nuovo profilo chiave: il **Deforestation-Free Supply Chains**

### Manager

## EMMA4EU: 3 pilastri operativi

### Compliance

Politiche sulla deforestazione nei percorsi di formazione

### Technology

Tecnologie di tracciabilità, sistemi di monitoraggio, strumenti digitali per il risk assessment

### Corporate Social Responsibility (CSR)

Approcci CSR Deforestation-Free Supply Chains nelle pratiche quotidiane di business

## APPROCCIO IN TRE FASI

Step 1

### JOIN

**Un'alleanza** per collaborare con partner diversi, condividere conoscenza e promuovere innovazione nella gestione sostenibile delle FRC e delle filiere.

Step 2

### LEARN

**Approfondimenti sull'EUDR** e sviluppo di competenze nella gestione di filiere deforestation-free.

Step 3

### TRAIN

**Corsi e opportunità formative** per sviluppare nuove competenze e affrontare le sfide operative legate alla deforestazione.

# LEARN

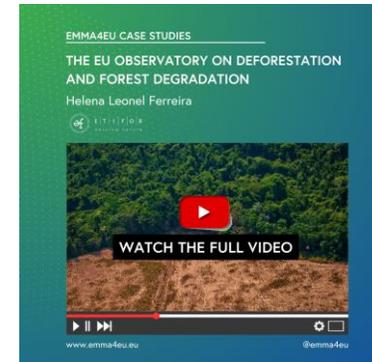

## Scopri le risorse gratuite

Competenze chiave per  
raggiungere filiere  
deforestation-free

Casi e pratiche rilevanti su DFSC  
e implementazione EUDR

Casi studio - 20 video che mostrano  
buone pratiche e criticità reali lungo  
filiera agricole e forestali, demand &  
supply side

# ROADMAP TO COMMITMENT

## Un Piano di azione per approvvigionamenti «deforestation free»

- Percorso interattivo, step-by step
- Azioni, domande, indicatori per misurare i progressi verso percorsi *deforestation-free*
- Raccomandazioni operative e iter personalizzati
- Integra i 3 pilastri EMMA4EU: compliance, tecnologia, CSR.
- Non è una checklist di conformità EUDR - è un piano di lavoro strutturato
- Adattabile a diverse commodities e contesti regionali.

# LA MAPPA. Le 5 fasi

Click on the step

[www.emma4eu.eu](http://www.emma4eu.eu)

## 5 FASI:

1. Definire obiettivi realistici e misurabili
2. Identificare i rischi
3. Sviluppare un Piano d'Azione
4. Monitorare l'avanzamento
5. Comunicare i risultati

## KEY ACTIONS

**1)** Identify common challenges and potential risks linked to the company's business operations and supply chains

**2)** Develop new policies or update existing ones to articulate commitments to address and remediate core issues linked to the environment (deforestation and conversion), human rights (violations and abuses), and fairness/equity (benefit- and cost-sharing)

**3)** Set measurable targets, realistic timelines, and consistent definitions in line with stakeholder expectations, legal frameworks, and international standards.

**4)** Engage stakeholders through participatory actions on identifying challenges and risks, defining the policy's scope, and assessing resource needs.

**5)** Integrate Policies into Corporate Governance and Supply Chain Operations.

## GUIDING QUESTIONS

- What procurement and sourcing decisions need to be adjusted to align with the new policies?
- How do we embed new commitments into corporate governance structures to ensure long-term accountability?
- How do we ensure that suppliers at all levels of the supply chain understand and comply with the new policies?
- What incentives or support mechanisms can we provide to suppliers to help them transition toward sustainable practices?
- How do we communicate our commitments and progress to external stakeholders, including investors, customers, and regulatory bodies?

## INNOVATION CASES AND TOOLS\*

- Produce, Conserve and Include (PCI) State Strategy (Compliance)
- Sustainability policy of the Dutch Pension Fund (Technology, CSR)

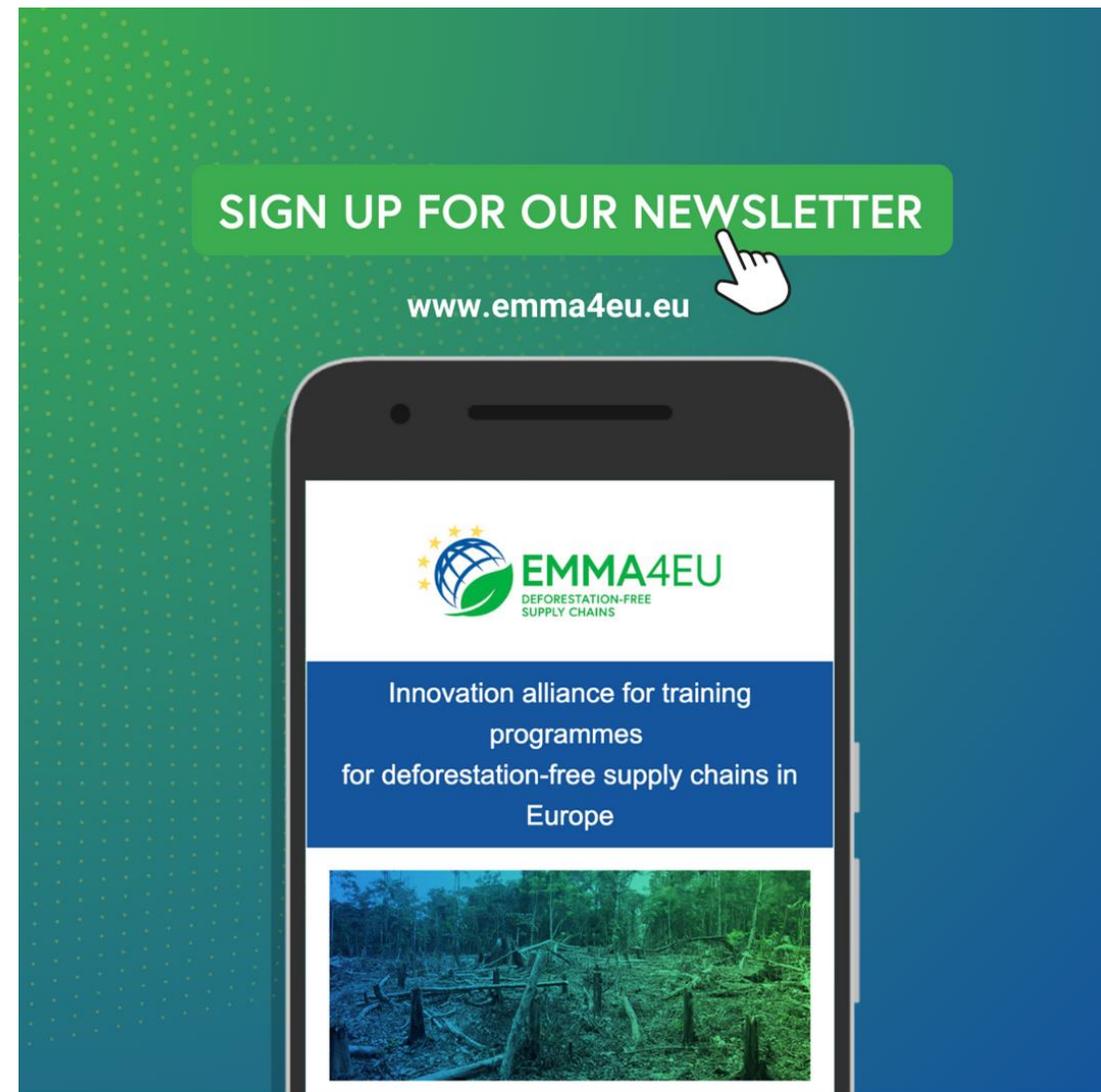

\*This section presents practices that support Deforestation-Free Supply Chains (DFSC) through Compliance, Corporate Social Responsibility (CSR), and Technological Solutions. Each innovation case and tool is tagged with its relevant focus areas. All featured cases are analysed in the [Innovation Report](#), and for some of them, you can also watch a video presentation by [clicking here](#).

DEFORESTATION-FREE  
SUPPLY CHAINS

Innovation alliance for training  
programmes  
for deforestation-free supply chains in  
Europe

# JOIN

## Perché unirsi all'Alleanza?

### Networking

Connect with alliance members to explore partnership opportunities, build collaboration, and exchange information.

### Events

Check out the calendar for upcoming webinars, events, and conferences. Do you have an event to share? Use the form to submit it!

### Jobs & Internships

Are you interested in supply chain management? Apply for open positions or advertise training and job opportunities at your organisation.

### Knowledge sharing

Explore and stay updated on the latest topics regarding EUDR and deforestation-free supply chains. Engage in discussions in the forum.
