General Information

Short summary

A Swedish company in the fashion and textile sector is seeking an EU-based manufacturer experienced in premium swimwear. The client requests partners with advanced fabric knowledge, sustainable sourcing, and flexible production capacities. Cooperation is sought under a supplier or manufacturing agreement.

Full description

The client is a Swedish enterprise specializing in the design and development of premium swimwear collections. With a focus on quality, comfort, and sustainability, the company is looking to expand its production capabilities through a reliable manufacturing partner within the European Union. The ideal partner should demonstrate proven expertise in producing high-end swimwear, including double-layer and reversible garments, and possess a strong understanding of advanced swimwear fabrics such as Italian stretch materials and recycled or regenerated nylon blends.

The company values partners who can support fabric sourcing, provide guidance on sustainable material choices, and have established relationships with reputable European mills. In-house pattern making and grading capabilities, as well as the ability to manage small to medium production runs with flexible minimum order quantities, are essential. The partner should also be able to source all necessary trims and labels, maintain a documented quality management system, and ensure compliance with EU regulations regarding product safety and labeling.

Transparency in the supply chain, adherence to environmental and corporate social responsibility policies, and structured production timelines are key requirements. The client is particularly interested in establishing a long-term, strategic partnership with a manufacturer that can contribute technical input to future collection development and support the brand's growth in the premium segment.

Advantages and innovations

- Demonstrated ability to produce double-layer, reversible swimwear with clean inseams and high-comfort finishing
- Expertise in sourcing and working with premium, sustainable European fabrics, including recycled and regenerated materials
- Flexible minimum order quantities, supporting small to medium production runs without compromising quality
- Documented quality management system ensuring consistent product standards and reliable delivery
- Transparent supply chain with established environmental and CSR policies

Technical specification or expertise sought

The client seeks an EU-based manufacturer (preferably in Portugal, Italy, Spain, or Poland) with:

- Proven experience in premium swimwear manufacturing, including double-layer and reversible construction
- Advanced knowledge of high-performance swimwear fabrics (e.g., Italian stretch, recycled/regenerated nylon)
- Ability to source and advise on sustainable materials and trims
- In-house pattern making and grading (XS–XL minimum, with potential for expanded sizing)
- Flexible MOQs, ideally below 100 units per style/color
- Documented quality management system (QC process, production tolerances, defect handling)
- Compliance with EU regulations (REACH, textile labeling)
- Transparent supply chain and CSR/environmental policies
- Experience supporting emerging or scaling premium brands

IPR Notes

Partner Sought

Expected role of the partner

The partner is expected to act as a manufacturing supplier, providing end-to-end production services for premium swimwear collections. This includes fabric and trim sourcing, pattern making, grading, production, quality control, and timely delivery. The partner should also offer technical input on materials and construction, support sustainable practices, and collaborate on future collection development as part of a long-term strategic relationship.
