## General Information

---

### Short summary

A Swedish womenswear SME operating in the contemporary fashion segment is seeking an EU-based manufacturer for woven garments. The company is looking for a long-term outsourcing agreement covering development, sampling, grading, and bulk production of modern feminine collections in lightweight fabrics.

#### Full description

A Swedish SME active in the contemporary womenswear segment is seeking a reliable EU-based manufacturing partner to support the ongoing production of its fashion collections. The company focuses on refined, feminine designs combining modern silhouettes with commercial relevance and consistent quality standards.

The collections primarily consist of woven garments, including dresses, jumpsuits, blouses, skirts, and lightweight trousers. Fabrics vary by collection and typically include viscose, cotton, blends, and other lightweight woven materials. Particular emphasis is placed on fabric quality, soft hand feel, drape, and overall comfort.

The company aims to establish a long-term outsourcing agreement with a manufacturer capable of managing the full development and production process. This includes:

- Pattern making and development
- Prototype and fit sample creation
- Pre-production samples
- Accurate grading in EU standard sizes (XS–XL)
- Bulk production with consistency between approved samples and final output

Quality assurance is a critical factor. The selected partner should demonstrate structured internal quality control procedures, ensuring high standards in stitching, construction, finishing, and production accuracy. Consistency across multiple product categories and across sizes is essential.

Production volumes vary per style and collection and generally fall within small to medium runs. The company does not operate on guaranteed repeat orders and produces on a collection-by-collection basis. Therefore, flexibility regarding minimum order quantities (MOQ), efficiency in handling varying volumes, and clear communication throughout each production cycle are required.

Sustainability and responsible production practices are important decision criteria. The company is interested in manufacturers that provide transparency regarding fabric sourcing, certifications, and compliance with EU production standards.

The objective of this international cooperation is to secure a dependable EU-based manufacturing partner capable of supporting the brand's development and growth through structured collaboration, technical expertise, and long-term commitment.

## Advantages and innovations

### Technical specification or expertise sought

#### Technical Specification or Expertise Sought

The partner should demonstrate:

Strong technical expertise in woven womenswear production  
Proven experience with lightweight fabrics (viscose, cotton, blends)  
In-house pattern development and grading capabilities  
Sampling and fit development expertise  
High-quality finishing and construction standards  
Ability to manage small to medium production runs  
Structured quality control processes  
Transparent sourcing and relevant compliance certifications

All designs are developed in-house, and intellectual property rights remain exclusively with the company.

### Stage of development

**Already on the market**

### Sustainable Development goals

- **Goal 12: Responsible Consumption and Production**
- **Goal 13: Climate Action**
- **Goal 8: Decent Work and Economic Growth**

### IPR Status

**IPR granted**

### IPR Notes

## Partner Sought

### Expected role of the partner

The role includes:

Pattern making and technical preparation  
Development of prototypes, fit samples, and pre-production samples  
Accurate grading in EU standard sizes (XS–XL)  
Bulk manufacturing in accordance with approved samples

Implementation of structured internal quality control processes  
Ensuring consistency in construction, stitching, and finishing  
Transparent communication regarding lead times, MOQs, and production planning

The partner should demonstrate reliability, attention to detail, and the capacity to support small to medium production runs on a collection-by-collection basis, with the objective of establishing a long-term, trust-based cooperation.
